

CITY OF DANVILLE
ASBESTOS INSPECTION CERTIFICATION FOR REPLACEMENT OF
SIDING, ROOFING OR FLOOR COVERING
DEPARTMENT OF COMMUNITY DEVELOPMENT
INSPECTIONS DIVISION
(434) 799-5263

Section 36-99.7 of the Code of Virginia and Section 110.3 of the Virginia Uniform Statewide Building Code (VUSBC) requires the submission of an asbestos inspection certification to the City of Danville Department of Community Development Inspections Division prior to the issuance of a building permit allowing a building to be renovated or demolished. The asbestos inspection certification must state that the affected portions of the building have been inspected for the presence of asbestos and that appropriate response actions will be undertaken in accordance with the Code of Virginia. The asbestos inspection must be performed by a person with a valid Asbestos Inspector's license issued by the Virginia Department of Professional and Occupational Regulations. The asbestos inspection requirement does not apply to single family dwellings or to residential housing with four or fewer units unless the renovation or demolition of such buildings is for commercial or public development purposes. This provision shall not apply if the combined amount of regulated asbestos containing material involved in the renovation or demolition is less than 260 linear feet on pipes or less than 160 square feet on other facility components or less than thirty-five cubic feet of facility components where the length or area could not be measured previously.
